

~~CONFIDENTIAL~~29th July, 1959COCOM Document No. 3641 BCOORDINATING COMMITTEEMEMORANDUM BY THE FRENCH DELEGATIONEXPORT OF ELECTRONIC TUBES TO POLAND

Further to a memorandum dated the 23rd April 1959 (COCOM Doc. 3502) concerning a proposal for an export to Poland by the Thomson-Houston Co. of electronic tubes to the value of \$ 34,500, the French Delegation have the honour to inform the Committee of the following additional details which have just been received from the Commercial Counsellor at the French Embassy in Warsaw.

These tubes are intended to be fitted into radar sets, of Polish manufacture, Type R.L.M. 61 A, and utilised to the extent of 3 tubes of each category (1 in service and 2 spares) per set.

These 50 radar sets, thus equipped, are to be installed on board fishing or trading vessels of the Polish merchant marine, to replace radar sets of foreign manufacture which they have been using up to the present and which have become obsolete or unfit for use.

Interested Delegates will be able to consult a descriptive booklet concerning marine radars of the R.L.M. 61 A type, which is being handed to the Secretariat at the same time as this document.

The French Delegation would be grateful if the Coordinating Committee would be good enough to make known their views on this export as soon as possible.
